

BLACKSMITHING

Craft • Weapon Quality • Durability • Steel Recipes

Core Roll: Wit dice vs. Craft (Blacksmithing) TN

Minimum: 2 successes to craft a weapon

Quick Rule: Roll a number of dice equal to Wit against the TN for the character's Blacksmithing rank. A weapon requires **at least 2 successes**. On a failed crafting test, the materials are destroyed.

Reference note: This PDF preserves the supplied rules while correcting two apparent wording slips: the advancement costs are presented as Grandmaster ranks 1/2/3 = **3/4/5 SA**, and the Superlative Quality result is labeled **Superlative** rather than Fine.

1. BLACKSMITHING SKILL

CRAFT TEST

Roll: Wit dice vs. the TN listed for the character's Blacksmithing rank.

Crafting threshold: 2+ successes.

Failure: If the test fails, the materials are destroyed.

Rank	TN	Notes
Untrained	10	Highest difficulty
Beginner	9	
Novice	8	
Apprentice	7	
Competent	6	
Journeyman	5	
Master	4	Best standard rank
Grandmaster I	4	+1 extra die
Grandmaster II	4	+2 extra dice
Grandmaster III	4	+3 extra dice

SKILL ADVANCEMENT

Skill Increase	SA Cost
Any regular skill rank increase	2 SA
Grandmaster I	3 SA
Grandmaster II	4 SA
Grandmaster III	5 SA

Blacksmithing, like other skills, can only be improved through expenditure of SA.

CRAFTING FLOW

1	Choose recipe	Select the desired bar/material and confirm its requirements.
2	Make Craft test	Roll Wit dice vs. Blacksmithing TN.
3	Check successes	2+ successes = weapon successfully crafted.
4	Check quality	Apply Fine or Superlative quality criteria if the material permits it.
5	Apply traits	Apply the steel's weapon traits and any quality improvements.

2. WEAPON DURABILITY

DURABILITY TRACK

Level	Condition
10	Pristine
9	Excellent
8	Good
7	Normal
6	Worn
5	Knotched
4	Damaged
3	Heavily Damaged
2	Critical
1	Broken

Broken: A weapon at the Broken durability level cannot be used.

DURABILITY LOSS — EACH USE

Steel	Chance per use	1 durability level lost on a trigger
Bloomery Steel	12%	Roll/resolve the weapon-use check.
Blister Steel	9%	Roll/resolve the weapon-use check.
Pattern-Welded Steel	7%	Roll/resolve the weapon-use check.
Wootz Steel	5%	Roll/resolve the weapon-use check.
Composite Steel	2%	Roll/resolve the weapon-use check.

REPAIR

Weapon Quality	Successes Required	Effect
Standard	2	Successful test restores 1 durability level per success.
Fine	3	Successful test restores 1 durability level per success.
Superlative	4	Successful test restores 1 durability level per success.

Repair test: Make a Blacksmithing Craft test. If the required number of successes is achieved, increase durability by **1 level per success**. If the skill attempt fails, the weapon is destroyed.

3. WEAPON QUALITY

STANDARD QUALITY

Material: Wrought Iron bars.

No additional quality test or improvement is required. This produces a standard-quality weapon.

FINE QUALITY

Material: Carburized Iron bars.

Quality test: If at least **3 rolled dice show 7+**, the weapon is Fine quality.

Choose ONE improvement	Effect
Improved Attack	–1 ATN
Improved Defense	–1 DTN
Increased Damage	St+0 → St+1; St+1 → St+2; St+2 → St+3

SUPERLATIVE QUALITY

Material: Meteoric Iron bars. Meteoric iron ore can only be found; it cannot be made.

Quality test: If at least **3 rolled dice show 9+**, the weapon is Superlative quality.

Choose TWO different improvements	Effect
Improved Attack	–1 ATN
Improved Defense	–1 DTN
Increased Damage	St+0 → St+1; St+1 → St+2; St+2 → St+3

Important: The two Superlative improvements must be different. For example, choose –1 ATN + –1 DTN, or –1 ATN + increased damage.

4. BASE MATERIALS

IRON BARS

Material	Furnace	Charcoal	Ore	Quality
Wrought Iron Bar	Bloomery	2	1 Iron Ore	Standard
Carburized Iron Bar	Bloomery	10	5 Iron Ore	Can produce Fine
Meteoric Iron Bar	Bloomery	20	10 Meteoric Iron Ore	Can produce Superlative

STEEL BARS

Material	Furnace / Hearth	Charcoal	Iron / Steel Inputs	Weapon Traits
Bloomery Steel	Bloomery furnace	6	4 Iron Ore	None
Blister Steel	Cementation furnace	8	2 Iron Bars	Cut/Puncture: +1 Blood Loss OR Blunt: +2 Shock
Pattern-Welded Steel	Bloomery Forge + Welding Hearth	10	2 Iron Bars + 2 Blister Steel Bars	Cut/Puncture: +2 Blood Loss OR Blunt: +3 Shock
Wootz Steel	Crucible furnace	10	2 Iron Bars + 2 Blister Steel Bars	Cut/Puncture: +3 Blood Loss OR Blunt: +4 Shock
Composite Steel	Forge + Welding Hearth	10	2 Iron Bars + 2 Blister Steel Bars + 2 Wootz Steel Bars	-1 Maneuver Cost AND choose: Cut/Puncture +3 Blood Loss OR Blunt +4 Shock

Material substitution: When a recipe says **Iron Bars**, use Wrought, Carburized, or Meteoric material as permitted by the recipe and desired weapon quality.

5. STEEL PRODUCTION — QUICK RECIPES

AT-A-GLANCE RECIPE CARDS

BLOOMERY STEEL

Requirements

- Bloomery furnace
- 6 Charcoal
- 4 Iron Ore

Weapon Traits: Weapon Traits: None

BLISTER STEEL

Requirements

- Cementation furnace
- 8 Charcoal
- 2 Iron Bars

Weapon Traits: Cutting/Puncture: +1 Blood Loss OR Blunt: +2 Shock

PATTERN-WELDED STEEL

Requirements

- Bloomery Forge + Welding Hearth
- 10 Charcoal
- 2 Iron Bars + 2 Blister Steel Bars

Weapon Traits: Cutting/Puncture: +2 Blood Loss OR Blunt: +3 Shock

WOOTZ STEEL

Requirements

- Crucible furnace
- 10 Charcoal
- 2 Iron Bars + 2 Blister Steel Bars

Weapon Traits: Cutting/Puncture: +3 Blood Loss OR Blunt: +4 Shock

COMPOSITE STEEL

Requirements

- Forge + Welding Hearth
- 10 Charcoal
- 2 Iron Bars + 2 Blister Steel Bars + 2 Wootz Steel Bars

Weapon Traits: -1 Maneuver Cost; plus Cutting/Puncture: +3 Blood Loss OR Blunt: +4 Shock

6. OBTAINING RAW MATERIALS

MINE ORE FROM A BOULDER

Result	Chance	Yield
1	70%	1 Iron Ore
2	15%	2 Iron Ore
3	10%	3 Iron Ore
4	5%	1 Meteoric Ore

Procedure: Mine a boulder, then determine the result using the listed probabilities.

CONVERT WOOD TO CHARCOAL

Result	Chance	Yield
1	70%	1 Charcoal
2	15%	2 Charcoal
3	15%	3 Charcoal

BLACKSMITHING CHECKLIST

✓	Have the required furnace / forge / hearth?
✓	Have enough charcoal?
✓	Have the required ore, Iron Bars, or Steel Bars?
✓	Roll Wit dice vs. Blacksmithing TN.
✓	Get 2+ successes or lose the materials.
✓	If applicable, check Fine / Superlative quality.
✓	Apply steel weapon traits and quality improvements.

One-line reference: **Wit dice** → **TN by rank** → **2+ successes** → **quality & traits** → **durability**.
